Realize the full business potential of your IT infrastructure

Focus on Business Priorities

Devote more time and budget to projects that give you a competitive edge

DATA CENTER SERVICES

From Where You Are To Where You Want To Be

Lenovo

Solution Services

Workshop Services

Principal Consultant led workshops allow us to gain deep understanding of your current and future IT requirement and develop near term recommendation on how Lenovo can help customer to achieve their IT transformation.

Assessment Services

Your business is unique, and so are your server, networking, and storage needs. We'll evaluate trends and best practices to identify the best path to IT system and infrastructure improvements in everything from high-density systems to cloud-based environments.

Design Services

Based on your company's distinctive demands and growth goals, we'll blueprint solutions that help expedite your time to value and reduce the need for specialized expertise from your IT staff.

Asset Recovery Services

Lenovo's Asset Recovery Service helps you mitigate the environmental and data security risks associated with end-of-life asset disposal, while providing a cash-back option for eligible equipment.

Implementation Services

Hardware Installation

Lenovo experts can seamlessly manage the physical installation of your server, storage or networking hardware, so you can quickly benefit from your investment.

Deployment Services

Implement a concise best-practices deployment methodology to install and configure administrative and user features, conduct the knowledge transfer session, and more with Lenovo Professional Service engineers.

Factory Integration Services

Rely on experienced installation and testing technicians for configuration and deployment tasks, as well as quality assurance testing, performed at the point of manufacturing.

Support Services

PremierSupport

Benefit from direct access to skilled Lenovo technicians, who serve as a single point of contact end-to-end, helping you to improve the stability of your data center operations as your business embraces increasingly complex technologies.

Preconfigured Support

Simplify the decision-making process with three preconfigured data center support levels. Choose the response time target that matches the importance of a particular system, workload, or application environment.

Managed Services

Lenovo service professionals proactively monitor your data center assets 24x7 to identify and resolve issues, maximizing performance and stability.

Technical Account Manager

A dedicated Technical Account Manager offers a single point of accountability inside Lenovo's operations, improves service and supportability planning, and delivers technical insights to enhance your business decisions.

Health Check

Lenovo Health Check services help maintain optimal performance and efficiency in your data center with a complete system analysis and best recipe updates.

TruScale Infrastructure Services

Lenovo TruScale Infrastructure Services offering is the ability for companies to purchase on-premises data center hardware (servers, storage, and networking) and services through a consumption model, rather than an upfront capital cost, similar to a public cloud.
