

Streamlining device management across borders

Business services software provider

Based in Australia, this business services software provider operates across Asia-Pacific, with many employees working from home or remotely. By selecting Lenovo TruScale Device as a Service (DaaS), it can ensure that all employees have the tools they need to work productively, no matter where they are based, all while taking the stress out of device lifecycle management. By outsourcing device management to Lenovo—including deployment, configuration, return, and attrition services—the company has slashed management workload and can offer a better service to employees.

Services

Lenovo TruScale Device
as a Service
Lenovo Premier Support

“Lenovo manages the entire lifecycle, from deployment to retirement, for all employee devices across the Asia-Pacific region—a huge weight off our shoulders.”
