- SUSE Linux Enterprise Server for SAP Applications

Services

- Lenovo Assessment Services
- Lenovo Design Services

Samnan Holding Group is a conglomerate based in Riyadh, Saudi Arabia. The 12 group companies operate in a range of sectors, including water solutions, retail and wholesale, petroleum, food services, and electromechanics. To keep operations running seamlessly, Samnan moved its core SAP applications to the SAP HANA database running on a hyperconverged Lenovo ThinkAgile HX Series cluster, and its non-SAP business systems to a second Lenovo ThinkAgile HX Series cluster. As well as improving the performance and reliability of both its SAP and non-SAP workloads, Samnan benefits from simplified management and easy scalability—helping the group keep pace with market changes and continue to thrive.

“We wanted a stable, reliable, resilient platform to support our most critical business applications. Lenovo ThinkAgile HX Series delivered just that.”

Mohamed Mostafa,
IT Director,
Samnan Holding Group
