Choose from the latest Lenovo devices with the built-for-business Intel vPro® platform and Microsoft Windows 10 — and focus on business priorities instead of IT management.
Cybersecurity is having a moment.

25% Security personnel waste 25% of their time chasing false alerts.¹

4x Nearly 4x more employees are now working remotely around the world.³

20% Remote workers have caused data breaches in 20% of organizations.⁵

74% of companies plan to permanently shift to more remote work post-pandemic.²

$3.9M The global average cost of a data breach is $3.9M.⁴

17M On average, employees have access to more than 17 million company files.³

3x Attacks on IoT devices tripled in the first half of 2019.⁶

68% of business leaders feel their cybersecurity risks are increasing.⁷

ThinkPad® X1 Carbon designed on Intel® Evo™ vPro® platform

Windows 10

Lenovo recommends Windows 10 Pro for Business.
The ThinkShield security portfolio — powered by the Intel vPro® platform — safeguards the entire lifecycle of a device, layering protections for holistic and comprehensive security coverage. It is built on a set of core beliefs about how best to serve the evolving security needs of your business teams.

ThinkShield is ready.

- **Strong security fundamentals allow IT to drive growth.** When IT spends less time on updates and password resets, they can serve a more critical role as drivers of innovation and growth.

- **Security that interferes with productivity is unacceptable.** If device security slows down your employees, they’ll find ways to circumvent it. The best solutions stay out of their way.

- **Innovation must not outpace security.** Every technological advancement opens an organization up to new threats — and the hackers are ready to exploit them. Security solutions must be able to adapt.

- **Comprehensive solutions reduce costs and pay returns.** Technical debt accumulates when you attempt to solve one security issue at a time with solutions that weren’t designed to work together. Customizable, end-to-end solutions reduce sunk costs and create new cost efficiencies.
What is ThinkShield?

A comprehensive portfolio of end-to-end security tools that encompasses hardware, software, services, and processes.

Advanced solutions across four categories

**ThinkShield Built-in Platform Security**
- Intel vPro® platform
- Microsoft Secured-core PC-ready
- Secure wipe
- Self-healing BIOS
- Tamper switch
- Security Engine
- Webcam privacy shutter
- Windows 10 Hello and FIDO2

*Security features for devices built on the Intel vPro® platform.

**ThinkShield Device Protection**
- Fingerprint reader with match-on-chip
- IR camera
- Keep Your Drive service
- PrivacyGuard with PrivacyAlert (shoulder surfing protection)

**ThinkShield Threat and Data Protection**
- Full-disk encryption and management
- SentinelOne® AI-powered antivirus

**ThinkShield Security Management**
- Absolute® software-based endpoint management
- IoT endpoint protection
- MobileIron mobile-centric, zero-trust security
- Lenovo Device as a Service
- Lenovo Commercial Vantage device management portal

76% of security pros are focused on detection, but protection can save businesses up to $1.4M per attack.

Only 38% of global organizations believe they are prepared for a sophisticated cyberattack.

Security by Design
Security begins in R&D and extends through our supply chain and the lifecycle of every device we build.

Secure Supply Chain
Every step of the manufacturing process is controlled, audited, and tamper-proof from our facility to your employees’ desks.

ThinkPad X13 i

Lenovo recommends Windows 10 Pro for Business.
Can your devices defend and repair themselves?

Advanced hardware security and BIOS protection hardens endpoints from attack and restores devices to a known good state.

**Intel® Hardware Shield**
Part of the built-for-business Intel vPro® platform, Intel® Hardware Shield puts extra locks on the Lenovo BIOS so a bogus firmware update can't take hold of your device.

**Infrared camera**
Integrated IR cameras enable biometric authentication and presence detection, which alert users to shoulder surfers and lock the device when the user is away.

**PrivacyGuard**
Filters the screen to restrict the field of view.

**Secured-core PC**
Guards against attacks aimed below the operating system, keeping malicious code out of the BIOS. Deep security integration between hardware, firmware, and the Windows 10 Pro OS builds a bedrock of security at the heart of the device.

**The root of trust**
Secured-core PCs boot up against a security checklist known as the "root of trust." If processes and movements deviate from the norm, boot-up is aborted.

**Secured-core PC Enablement Services**
The Lenovo team can configure a Secured-core PC at the factory, ensuring your entire fleet is enabled consistently and accurately.

**Firmware vulnerabilities have grown**
750% since 2016.¹

Gartner predicts that 70% of enterprises without a firmware upgrade plan will experience a firmware breach by 2022.¹¹

**Port protection**
Smart Thunderbolt™/USB protection prevents unauthorized data transfer by restricting port access to only non-storage peripherals.

**Security Engine**
A custom chip embedded within Lenovo Think devices that performs security functions that are completely isolated from the software.

**USB secure hard drive**
High-level, 256-bit AES security, as well as a keypad for entering an 8- to 16-digit password.

**Webcam privacy shutter**
Integrated physical webcam cover assures that the camera is not in use.

Lenovo recommends Windows 10 Pro for Business.
Almost every component in a PC is susceptible to attack. The Lenovo ThinkShield portfolio is watching all of them. You can’t be with employees every minute... but ThinkShield can.

Next-generation antivirus protection
Cloud-based and autonomous, SentinelOne® uses AI and ActiveEDR to predict, prevent, and stop even zero-day attacks, alerting the network and rolling your devices back to a clean, known good (pre-breach) state.

Secure disposal
Your data is protected even when your device reaches end of life. You can elect to keep your hard drive, or we can securely wipe the data and dispose of the device in an environmentally sensitive manner.

Data encryption
Whether data lives on a device hard drive or in the cloud, ThinkShield protections — including WinMagic — can encrypt it from end to end so sensitive data can be safely shared.

Frictionless authentication
Eight modes of secure authentication — including biometrics, PIN, and picture passwords with Windows 10 Hello — take the peril out of passwords and credentials.

Lenovo’s match-on-chip and match-on-network fingerprint readers are the most secure in the industry.

Intel® Evo™ vPro® platform

ThinkShield
Defending your data against tomorrow’s threats.

38% of employees are not confident they know how to stay secure while working remotely.

46% of websites have high-security vulnerabilities that an end user could never know about.

Lenovo recommends Windows 10 Pro for Business.
Is it really a solution if you’re working harder?

ThinkShield gives IT teams a custom-fitted solution to protect and manage the entire fleet — even remotely.

**Flexible patching**
Lenovo Patch makes it easy to quickly patch vulnerabilities and keep devices up to date. Critical patches can be instantly delivered organization-wide.

**Lenovo Thin Installer**
Install updates behind the scenes automatically without involving the end user. Lenovo Thin Installer also directly injects a patch into the OS without adding code.

**Absolute® Persistence endpoint management**
The Absolute® software dashboard delivers visibility and access to every device in your network, no matter where it’s operating.

**Self-healing BIOS**
The Lenovo BIOS automatically restores endpoint devices to a clean, pre-breach known good state in the event of an attack.

**Windows Autopilot**
Simplify deployment with zero-touch device provisioning for IT.

**Lenovo Commercial Vantage**
Give your users a central portal that you configure — to manage hardware settings, set preferences, and check system updates.

**Device as a Service**
Deploy devices with security that is always up to date.

$1.55M
Incident response automation can reduce the total cost of a data breach by $1.55M.15

Discover the smarter simplicity of Device as a Service

Take the next step to seamlessly enable your workforce and let Lenovo take care of everything — all for one affordable, predictable monthly fee.

Choose from the latest Lenovo devices with the built-for-business Intel vPro® platform and Microsoft Windows 10 — and focus on business priorities instead of IT management.

Free up capital and improve employee productivity.

Get end-to-end services and support that precisely match your needs.

Enjoy the simplicity of one predictable monthly fee.

Easily add or remove devices from your plan. Pause your service as business needs change.

ThinkShield

Lenovo DaaS
A refreshingly simple approach to device management

63% of respondents in a recent global survey indicated they were interested in a DaaS solution.

ThinkCentre M90a All-in-One

ThinkPad X1 Extreme

Lenovo recommends Windows 10 Pro for Business.
The next step in the ongoing digitization of industry is the Internet of Things (IoT): bringing connectivity and intelligence to a new class of devices. Sensors, robotics, autonomous vehicles, medical equipment — connected objects are transforming businesses. But many of these devices were not designed with security in mind.

With the Lenovo ThinkEdge SE30, businesses have a simple edge computing option for securing and centralizing the management of connected devices.

**5 minutes**
The amount of time it takes for an IoT device to be attacked by bots once connected.18

**Absolute**
If critical applications go offline or malfunction, Absolute Persistence technology can automatically get them back online.

**Encryption**
In addition to a TPM chip, encryption services like Windows BitLocker and WinMagic can protect data from prying eyes.

**MobileIron**
Provides a console through which IoT devices, data, security, and policies can be managed.

**Virtualization-based security**
Isolates IoT device activity from other critical processes, preventing malware from entering the network.

ThinkEdge SE30
A secure gateway for protecting IoT devices against attack. All devices connected to the ThinkEdge SE30 benefit from ThinkShield protections.

Free up your time to innovate.

IT leaders do more than protect data. You accelerate progress.

IT security gives organizations a competitive edge. The ThinkShield security portfolio speeds technological progress without impeding the employee experience.

IT security isn’t a cost — it’s an investment that drives returns.

With ThinkShield solutions in place, IT will spend less time setting up, monitoring, and securing devices, and more time implementing breakthrough technology.

Security solutions keep IT teams agile and ahead of the game.

You don’t have to play catch-up. ThinkShield solutions prepare you for tomorrow’s threats with PCs that can defend themselves.

Evolve and thrive with ThinkShield security

ThinkShield is Lenovo’s security portfolio of hardware, software, services, and processes — fully customizable solutions to secure your critical data and business technology. Lenovo recommends Windows 10 Pro for business powered by the Intel vPro® platform.

Visit www.lenovo.com/FlexibleWorkforce and connect with a security specialist. We can help customize the right solution for your business.

53% of executives are “extremely concerned” about the effects of cyberthreats on growth prospects.28

86% of businesses that believe in security’s ability to open new business opportunities saw 10%+ revenue growth year over year.29
