It’s time for a thinking revolution
IT decision-makers and end users weigh in on the thinking gap and how to bridge it

Where we are: A new and growing thinking gap

People are overburdened and overwhelmed. With increasing time pressures and recent societal disruption, we have deprioritized deeper thinking. Practical, "survival" thinking has taken over.

Where we need to go: The power of better thinking

Deeper, clearer thinking has transformational benefits. What do we stand to gain?

Technology can help bridge the thinking gap

It’s not about unplugging. Technology is a ubiquitous part of life. So, when it comes to raising our level of thinking, it’s a "how"—not an "if."

Technology is a tool that can help bridge the thinking gap. It’s not about unplugging. Technology is a ubiquitous part of life. So, when it comes to raising our level of thinking, it’s a "how"—not an "if."

The Thinking Technology formula

More than 50% of end users would consider reevaluating their relationship with technology and learning how tech can help them think better.

#1 must-have for better thinking?
A quiet environment.

Smarter technology powers BETTER THINKING

Supports individual preferences and styles of working
Limits distractions
Decreases information clutter
Simplifies tasks

Read the full report to get the whole story, including what the research reveals about differences in the four countries surveyed. At Lenovo, we design ThinkPad to inspire bold, deep thinking.
