## Where we are: A new and growing thinking gap

People are overburdened and overwhelmed.

With increasing time pressures and recent societal disruption, we have deprioritized deeper thinking. Practical, "survival" thinking has taken over.

**Only 34%** think deeply most or all the time. Fatigue and burnout keep 58% from doing their best thinking. 65% of respondents believe clear, deep, productive thinking will help them make better decisions.

**Eye-opener** We lose of hours to lower-quality thinking.

# Where we need to go: The power of better thinking

Deeper, clearer thinking has transformational benefits. What do we stand to gain?

## **Individually**

60% to 85% say deeper thinking

- promotes
- Self-awareness Creativity
- Improved outlook
- Stress reduction

## Collectively

Many believe society would be

- Kinder
- More peaceful
- Closer to solving systemic problems
- More productive

What is thinking?

# **Technology can help** bridge the thinking gap

It's not about unplugging.

- The Technology-Thinking formula -

**Using technology** more purposefully

**Setting boundaries** around technology use

more productive thinking

Clearer, deeper,

Technology is a ubiquitous part of life. So, when it comes to raising our level of thinking, it's a "how" — not an "if."

### of end users would consider reevaluating their

relationship with technology and learning how tech can help them think better **Smarter** 

technology empowers
