Wireless Charging Kit

The future of notebook charging.

Put the flow back in your workflow with the ability to shift positions during your day and rapidly refuel your notebook whenever you return to your desk without the need for cables. Operating on a first-of-its-kind Power-by-Contact (PbC) technology, the Lenovo Go Wireless Charging Kit makes it possible to wirelessly charge most 13"-14" USB-C non-touch notebooks up to 65W with an impressive 93% efficiency.

Why choose the Lenovo Go Wireless Charging Kit?

Futuristic wireless charging

Enhance your productivity with the future of charging. Designed by Lenovo and powered by Energy Square's technology, the Lenovo Go Wireless Charging Kit is an innovative new way to wirelessly charge notebooks via PbC's high-efficiency solution so you can spend more time working and less time managing cables.

Modern minimalist aesthetic

At just 3.2 mm thick, the Lenovo Go Wireless Charging Kit is as light as it is stylish. Its sleek storm grey exterior, UV-coated matt top cover, brushed nickel/silver charging tiles, and thunder black matt bottom cover create a futuristic ambiance. With an ergonomic USB-C wireless receiver and construction from 25% recycled materials, both you and the environment will feel good about your purchase.

Remarkable energy efficiency

PbC was engineered with efficiency in mind and delivers a charging efficiency of 93%, which is much higher than the 75% efficiency that our wireless mobile chargers achieve with inductive Qi. With a max. output of 20V, 3.25A, and 65W, users can safely charge most 13"-14" USB-C non-touch notebooks.
