

Mobilize for the always-on workforce

Smarter technology for all

Reboot the way organizations work from anywhere, anytime with a device made for on-the-go productivity.

The Lenovo ThinkPad® X13s is always on for what's next.

X13s

Snapdragon is a product of Qualcomm Technologies, Inc. and/or its subsidiaries.

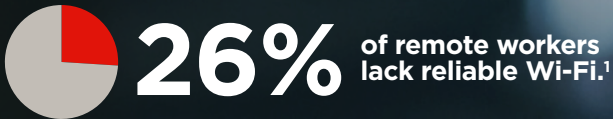

“Work anywhere, anytime” is the new enterprise model

The new-generation workforce is breaking through the traditional barriers of productivity and connectivity. Expectations have risen for IT professionals to meet the demand for new devices to fill the gap between the familiar, continuous connectivity of smartphones and the enterprise-ready experience of Windows-based laptops. This is their list of must-haves.

Connectivity from anywhere

When work happens from anywhere, connectivity, duration, and portability become essential. Devices must support multiple conferencing platforms with clear, dependable video and audio.

Multi-day battery life

Battery life is one of the biggest pain points for users.² Organizations must find devices that provide incredible performance with long battery life.

Premium performance and productivity

Users expect a fast and responsive performance from an enterprise-first device, ready to integrate seamlessly with the applications they use every day.

End-to-end security

The mobile workforce is expanding the nature and perimeter of these threats beyond devices and networks. Ensuring worry-free end-to-end security keeps organizations productive and protected.

Empower tomorrow's workforce to work on their own terms

Lenovo ThinkPad® powered by the Snapdragon® 8cx Gen 3 Compute Platform and Windows 11 on Snapdragon have created a new category of premium laptop for the ultra-mobile workforce.

Connected

Realize the full potential of smart collaboration features from the best-connected commercial notebook with 5G mmWave support, 5G sub-6, 4G LTE backward compatibility, and Wi-Fi 6E.

Collaborative

Enhanced collaborative experience with a 5MP MIPI camera, videoconferencing AI, noise suppression, echo cancellation, auto framing, and multipoint connectivity between devices. Gain enterprise-class integration with leading business applications.

Productive

Lightning-fast speeds, multi-day battery life, and true instant-on make this laptop ready to get to work anytime, anywhere. The ultra-light weight and slim design provide maximum portability.

Secure

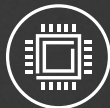

Security must be designed to adapt to the future of work. **Lenovo ThinkShield** platform security, Microsoft Pluton integrated into the Qualcomm® Secure Processing Unit, advanced AI protection, human presence detection (HPD) including computer vision, e-shutter, and more combine to protect your road warriors.

Sustainable

The new workforce values environmentally sensitive devices. The lower power draw, recycled magnesium, and unique automatic sleep/wake-up features of this laptop ensure productivity and sustainability.

5 Megapixels f/2.0 Digital Mic Array

ThinkPad X13s

The first ThinkPad with Windows on Snapdragon

The first ThinkPad with 5G mmWave support

The first ThinkPad with 90% recycled magnesium

The best battery life ever in a ThinkPad

The only ThinkPad with fan-less design

Lenovo ThinkPad® X13s

Defining the always-on, always-connected PC experience

The **Lenovo ThinkPad X13s** powered by the Snapdragon® 8cx Gen 3 Compute Platform and Microsoft Windows 11 Pro brings a new level of mobile computing to the enterprise.

This ultra-thin and light 1.06kg fan-less 13" laptop was built for the new era of WFA with multi-day battery life, advanced connectivity, and enterprise-level productivity and security features. And, because it's a ThinkPad, this portable powerhouse includes the ThinkPad TrackPoint keyboard and the spill-resistant, backlit, glass-like ThinkPad TrackPad.

The ThinkPad X13s is ready for business

The **Lenovo ThinkPad X13s** features integrations with the companies you already trust and rely on for productivity, security, and collaboration.

Enhancing IT services with Premier Support

Increasing support requests and security threats do not have to limit the efficacy of your IT team. Get direct access to elite Lenovo engineers and have routine support requests handled for you, freeing up time to concentrate on moving forward.

Advanced technical support available anytime in 100+ markets

Real relationships with technical account managers for escalation management

A single point of contact for case management

Comprehensive hardware and original equipment manufacturer (OEM) software support

Priority on service delivery and repair parts

Customized reporting and product support on the Lenovo Service Connect Portal

Lenovo TruScale™ Device as a Service: A refreshingly simple approach to device management

Lenovo TruScale provides IT leaders the performance and flexibility to pay as they grow while ensuring the reliability and peace of mind of IT considerations like security, governance, and latency in a hybrid environment. From hardware and licensing to support and management, simplify your process with one contract and one point of contact.

Take the next step to seamlessly enable your workforce and let Lenovo take care of everything — all for one affordable, predictable, and flexible rate (monthly, quarterly, annually).

Find out what your savings could be [here!](#)

- Free up capital and improve employee productivity.
- Get end-to-end services and support that precisely match your needs.
- Enjoy the simplicity of one predictable monthly fee.
- Monitor and assess device health and usage with proactive, predictive analytics.
- Easily add or remove devices from your plan. Pause your service as business needs change.

63% of respondents in a recent global survey indicated they were interested in a DaaS solution.⁴

Are you ready to reboot?

The ThinkPad X13s — for your always on, always connected, work anywhere workforce.
