

# All roads lead to collaboration

Students, educators, administrators, and the community need to feel invested in education, informed about progress, and confident in the technology used.

**Innovative collaboration empowers everyone.**

## Where are we going?

**>80%**

### Administrators

Over 80% of learning design professionals surveyed **say collaborative learning is "important" or "essential."**

### Students

**Students who participate in active, collaborative learning perform better on tests.**

In contrast, students who learn by lecture alone are 1.5 times more likely to fail.<sup>3</sup>

**40%**

### Educators

40% of educators surveyed **say improving collaboration is their #1 tech priority.**<sup>2</sup>

**24%**

### Community

**Family and community involvement has been shown to increase attendance** by 24%, improve grades, improve social and emotional skills, and increase graduation rates.<sup>4,5</sup>

## How do we get there?

Collaboration empowers everyone in education and ensures IT teams have the support needed to innovate. Microsoft Teams, along with Lenovo's tailored solutions powered by **Intel® processors**, unlock new learning opportunities.

**Students** benefit from more interaction, engagement, and opportunities for active learning.

**Educators** assign, track, and grade class assignments and form specific Teams to pool resources, share experiences, and receive necessary support.

**Administrators** focus on the most effective ways to support the entire process through detailed data about progress — including grade trends, social and emotional learning, group assignment information, and engagement signals.

**Families** stay up to date on their students' Teams assignments, classroom engagement, learning progress, time management, and teacher contacts.

**Communities** connect and share to provide a consistent and safe learning environment for everyone.

## Are we there yet?

Arrive at more meaningful collaboration faster with the **Lenovo ThinkPad® L13 Gen 3**. No matter where work gets done for the classroom, students and educators rely on the power and durability of the Lenovo ThinkPad L13, running **Windows 11** and powered by **Intel® vPro®** for a world-class education PC solution.

Work from anywhere with lightning-fast **Intel® Wi-Fi 6E.\***

Ensure Teams meetings are crisp and clear with the optional FHD camera, along with **Dolby Audio™** and **Dolby Voice®** AI noise suppression.

Connect dependably to accessories at home or in school with the wide array of ports, including **Intel® Thunderbolt™ 4** and **HDMI®**.

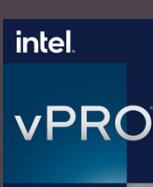

Withstand accidental knocks, drops, and spills with **hardware designed to stand up to the rigors of student use.**

Your systems are safeguarded by our **ThinkShield** suite of security solutions and a fingerprint scanner, along with **Intel® Hardware Shield:** hardware-based, multilayered security with active monitoring against system attacks.

Contact your representative today to learn more. And take a look at Lenovo's complete lineup of innovative solutions for K-12 education **here.**
