Protect against cyberthreats
Increase data and device security with solutions purpose-built for the dynamic nature of care delivery.

Clinicians can reduce their sign-on time by 69% with SSO solutions.¹

Device protection
Increase patient safety by reducing infection transmission via devices.

Antimicrobial surface treatment* Select ThinkPad devices are surface-treated with an ISO 22196-compliant antibacterial treatment.

Built for durability
Device finish and surface treatments have been tested with more than 10,000 wipe-downs.

Lenovo Quick Clean Software Suspends user input, allowing quick disinfection without shutting off the device.

Infection prevention protocols can reduce healthcare-associated infections by 70%.²

Data protection
Protect patient data with advanced privacy and security solutions.

Network and GPS security
Authenticates users based on IP address and geo-location.

SentinelOne Detects and protects against malware strains using next-generation behavioral AI.

In 2021, healthcare providers expect a 300% increase in data breaches compared to 2020.³

Security management
Keep data and devices safe and secure, regardless of location, with real-time endpoint protection.

Absolute® Delivers persistent security management with endpoint visibility and control.

Lenovo Patch Auto-updates the BIOS, driver, and third-party apps.

Lenovo RSVP Creates, changes, or removes the supervisor password remotely and at scale.

75% of IT security personnel say they are not keeping up with software patching.⁴

*The antimicrobial surface treatment is not a public health statement nor is it intended to protect users against disease-causing organisms.

Platform security
Considered one of the top threats to security with a high impact on patient safety due to a simple attack on a server being able to create an infected network that accesses patient data.

Device protection
Arm yourself to the future with the Lenovo ThinkPad® X1 Carbon Gen 9. Secure your data and devices with advanced privacy and security solutions now available at Lenovo.com/Health.

Lenovo® and ThinkPad® are registered trademarks of Lenovo in the United States, other countries, or both.

Bufferzone Isolates web browsing and email activity with a virtual container. It secures a PC by ThinkShield and powered by the Intel® vPro™ platform.

WinMagic Protects data stored on devices through enterprise-level encryption.

RFID tap-to-login Enables time-saving single sign-ons (SSO) for users.

PrivacyGuard Integrated e-privacy filter prevents others from viewing sensitive information.

Shoulder surfing protection Reduces the likelihood of visual hacking with gaze detection technology.

Secure disposal Protects patient data with both the Secure Wipe feature and Keep Your Drive service.

Biometric authentication Logs users in securely with Quantum Matcher anti-spoofing algorithms.

Webcam privacy shutter Increases patient confidence with the webcam privacy cover for regular and IR cameras.
