

ThinkPad® T490 Healthcare Edition

PERFORMANCE MEETS PATIENT SAFETY

Laptop Mag's best laptop brand two years in a row* is now optimized for healthcare, with advanced features for secure network authentication, easy disinfection, and privacy protection. The speed and performance hospitals depend on are smartly designed with the safeguards patients need.

Built for Patient Care

Badge in to the laptop and authenticate to the network at the same time. The built-in RFID reader aligns computer access with facility access. The reader supports both RFID and NFC technologies, is compatible with all major single sign on providers, including Imprivata®.

The FIPS 201-compliant fingerprint reader exceeds biometric security requirements for the DEA's interim rule on "Electronic Prescription of Controlled Substances (EPCS)," helping hospitals ensure a higher level of encryption and network security while simplifying workflow for clinicians.

Add an IR camera to log in to Windows Hello and other authentication platforms using facial recognition technology.

Facial Recognition IR Camera for Windows Hello

Up to 400 nit FHD Display

FIPS 201-Compliant Match to Network Fingerprint Reader

RFID/NFC Secure Tap-to-Logon, Imprivata-Certified

ISO 22196-Compliant Antimicrobial Surface Treatment

A Strategy for Device Cleaning

The T490 Healthcare Edition represents a novel and thoughtful approach to the rigorous demands of healthcare sanitization. Tested according to CDC guidelines for cleaning, disinfecting, and sanitizing, this ThinkPad is designed for the healthcare environment. It can withstand repeated daily cleaning and has been tested with reputable brands such as Virox Accel Wipes, PDI Germicidal Wipes, and B. Braun Meliseptol.

The T490 Healthcare Edition comes preloaded with the Lenovo Quick Clean software application, which suspends user input for a customizable period of time to allow for thorough wipe-downs. An ISO 22196-compliant antimicrobial surface treatment offers an additional layer of protection.

Computing Power with Privacy Protection

A new premium Dolby® Audio™ Experience and dual far-field microphones provide crystal-clear reception for telemedicine consultations and video conferences. After a conference, the ThinkShutter completely covers the RGB and optional IR cameras to prevent intrusion.

The up to 400 nit Full-HD display delivers high-resolution clarity for viewing medical imaging, while the optional PrivacyGuard filters the screen to prevent visual hacking.

ThinkPads incorporate the entire family of Lenovo ThinkShield protections for device, identity, online persona, and data.

BECAUSE IT'S A THINKPAD...

Powered by up to an 8th Generation Intel® Core™ i7 processor with vPro™ and equipped with DDR4 memory and PCIe SSD storage, the T490 Healthcare Edition can facilitate data connectivity, power through demanding tasks, and keep up with the fast pace of a large healthcare organization.

Interact with applications effortlessly using the optional touchscreen display

Connect to the Thunderbolt™ 3 Dock Gen 2 for lightning-fast data transfer

Manage rigorous shifts with the convenience of an ultralight device and the reliability of 16-hour, rapid-charge battery

ThinkPad
Wireless Mouse
