

# Lenovo Enterprise Software Guide

Business Challenge	Software Solution (Lenovo or Partner)
Identifying and updating 3rd party software patches, Lenovo drivers, firmware and BIOS updates	Lenovo Patch for SCCM
Managing and securing out-of-band devices and data	Absolute
Provisioning, managing and securing multiple device platforms (Windows, iOS, Android, etc) in an enterprise environment	Mobile Iron
Migrating to Modern IT environment around the Microsoft ecosystem (Azure, Microsoft 365, Dynamics, etc.)	Lenovo as a Microsoft Cloud Solution Provider (CSP)
Meeting increased regulatory compliance (NIST, FISMA, HIPPA) related to endpoint data encryption and avoiding costs associated with data breach	WinMagic
Proactively managing and supporting an Enterprise-class Chromebook environment	Chrome Enterprise Management Console
Monitoring end-user activity and enforcing corporate security policies around the clock	Lenovo Security Console powered by Coronet
Preventing malicious tampering, post deployment, to the golden image	Faronics Deep Freeze (Reboot to restore)
Mitigating security threats and vulnerabilities in real-time in today's IoT world	SentinelOne
Presenting a diverse collection of applications (web/legacy Windows, etc.) and file shares in a GUI across multiple device platforms with the simplicity of SSO	Lenovo Unified Workspace
Managing student access to, and use of school- owned devices and software	LanSchool and LanSchool Air
Organizing and sharing a disparate suite of SaaS tools and products	Airstack
Managing and securing single- or multi-vendor thin client platforms within or outside the corporate domain	Lenovo Terminal Manager
Leveraging thin client/VDI infrastructure on existing (fully-depreciated) client devices	Cloud Desktop
