

# ThinkCentre THIN CLIENT

## Why Lenovo for Thin Clients:

Lenovo's **powerful** yet **versatile** and **simple-to-manage** thin client solution provides simplified IT engagement and streamlines endpoint management with intuitive **configure-to-purpose** devices. Effortless, low and no-touch device management with Lenovo Terminal Manager (LTM) reduces downtime, speeds deployment and simplifies updates and repurposing.

Compatible with:

Firmware:

**Wi-Fi Options:**  
 Qualcomm Atheros QCA9377  
 Intel 9260

**IO Port Options:**  
 VGA  
 Serial  
 HDMI  
 DisplayPort

Health

# Lenovo Terminal Manager – LTM

“Lenovo LTM managed every thin client in our network and protected our investment in legacy devices – actually improving their performance.”

[Click to view](#)

## What can LTM manage?

### LTM can manage the following devices:

- Lenovo Thin Clients
- LeTOS, WES7, Win10-IoT
- CloudDesktop

### LTM can also manage the following third-party devices:

- Dell-Wyse, HP, IGEL, 10Zig, etc.
- WES7 and Win10-IoT only

### LTM Third-Party Licensing

- Third-party devices need a purchased LTM license
- Mandatory first year support and maintenance chargeable

- Hierarchical Grouping
- Group Profiles
- Device Discovery
- Task Management

- Remote Control
- Patch Devices
- Remote OS Imaging
- Full Control

- Software Deployment
- Comprehensive Reporting
- Remote Repositories

## Accessories

### Seal Shield Keyboard

- Cleanable, wipeable and dishwasher safe
- Available with Tap n Go RFID option

### Tiny In One Monitor\*\*

- 22", 24" and 27" models
- Touch screen available

### ThinkCentre Tiny VESA Mount II

- House your Tiny PC in this VESA mount for utmost mounting flexibility

Feature	M625q	M715q

\* Video upto 720p full screen. Higher resolutions could cause performance issues

\*\* Inserting the M625q thin client into a TIO can cause the M625q to switch to a low-power mode

### Transition to thin-client computing, the easy way – and dramatically extend the working life of your legacy PCs

Moving to a thin client infrastructure is an attractive proposition. Ironically, the main thing that holds companies back is the past – replacing their investment in legacy PCs, in a short pace of time, can be costly. CloudDesktop provides a unique stepping stone from fat clients to thin clients by converting current hardware into secure, centrally managed thin client devices.

### LeTOS Zero configuration makes thin client deployment faster and easier to manage

All of Lenovo's LeTOS Thin Clients are equipped with LeTOS Zero configuration technology. This allows the devices to be deployed without the need for any configuration by the installer – simply place, connect and go. LeTOS Zero devices configure themselves via DHCP and a simple configuration file, allowing the complete OS to be configured, including connections. Zero configuration computing made easy.
