# End-to-end IT Infrastructure Solutions to Ensure a Productive Mobile Workforce

Everywhere around the world, the workforce is on the move. Mobility is the name of the game. If you're like most organizations, you're responding to this trend by investing heavily in mobile tools and infrastructure. That's great news for workforce productivity, flexibility and employee happiness, but it is challenging news for security and control. To get the most out of mobility, it's critical to have a future-ready infrastructure that can keep pace with the new age workforce and style.

# Devices are Decisive

When thinking about a future-ready infrastructure, you need to start with the end computing devices. The devices you choose to give to your employees will have a direct impact on their productivity and efficiency.

- The impact of equipping your workforce with the right end point devices is two-fold. It will allow your employees to focus exclusively on their work, rather than having to worry about issues like connectivity and performance.
- The seamless work environment will make for happier employees who are less likely to quit because of an ill-equipped workplace.

# Why Lenovo for Mobility

Lenovo devices transform mobile productivity. We have developed an exceptional portfolio of the highest quality mobile products and services including ultrabooks, convertibles and tablets. With Lenovo's ThinkPad X1 product family, ThinkPad T series and E series of products, employees get the freedom to work anywhere with uncompromising performance. These devices offer all the essentials for a productive mobile workforce:

## Performance

- Dual and quad-core processors
- 4-8GB of RAM
- 500GB to 1TB hard drive
- High-resolution LCD screens
- Dual-band WiFi
- Long-lasting batteries

## Security

- Windows-compatible
- Hard drive encryption
- Biometric fingerprint recognition
- Protect identity and secure data with **Intel® Authenticate**
- Remote maintenance and wireless manageability with **Intel® Active Management Technology (AMT)**

## Flexibility

- Full PC capacity in a 2-in-1 device
- Modular expandability
- Light and thin

## Connectivity

- 4G LTE-A mobility
- Optional WiGig dock

## Durability

- MIL-SPEC durability
- AMOLED displays
- Spill-resistant keyboard
- Shatter-resistant glass

## Quality

- Carbon fiber cover
- Disk Drive Bracket to protect the hard drive from shocks and vibrations

Lenovo™

# ThinkPad X1 Series

The innovative Lenovo ThinkPad X1 family of mobile devices represents the next generation of enterprise computing, combining sleek, consumer-inspired designs with unprecedented security and IT manageability.

## Get Used to Checking Your Bag

Starting at less than three pounds, the ThinkPad X1 devices are our smallest and thinnest devices yet. You might find yourself checking a lot to make sure it's really there.

## Sacrifice Nothing for Portability

With a smaller footprint than previous generations, the X1 devices are easier to hold, carry, and take your work on the go. But the best part? We've packed in even more processing power, more memory, and more storage to drive your business. Plus we managed to keep the incredible display. Now that's innovation.

## We've Got Your Back

With four layers of carbon-fiber reinforced chassis and a magnesium alloy roll-cage for added strength, we've engineered the X1 family of products to handle whatever comes your way. From spilled drinks, to drops and knocks, these devices are tested against 12 military-grade requirements and pass more than 200 durability tests. Whether it's a day at the office, or a day on the move, X1 has you covered.

## Up and Running, Even if You're Not

Even when WiFi is out of range, the optional Qualcomm® Snapdragon™ X7 LTE-A means you always have connectivity and access to all your data and apps in the cloud.

 Windows 10 Pro

Lenovo recommends Windows 10 Pro.

### From 0 to 80 in 60

X1 devices deliver up to 15.5 hours of battery life. And if you're running low, the rapid charging feature provides 80% capacity in just an hour. So a lunch break or a layover can easily boost your battery up to more than 12 hours.

### Prepare to be Thunderstruck

The X1 devices include Intel® Thunderbolt™ 3, the technology that brings lightning-fast Thunderbolt to USB-C at speeds of up to 40 Gbps. Supporting enterprise thin-and-light PCs and mobile workstations. Thunderbolt™ 3 moves massive files, images and video at speeds 8X faster than USB 3.0. And with Lenovo's Thunderbolt simplified docking solution, support those heavy content creation or data intensive tasks easily. Also, your experience is improved with faster charging, peer-to-peer data transfer and connection to two external 4K displays.

### Less Really is More

X1 Carbon is available with Microsoft Windows 10 Pro Signature Edition. No more trialware or unwanted apps. No more distractions — and easy provisioning for IT pros.

### We Mean ALWAYS Covered

X1 Carbon comes with a standard worldwide warranty. That means that you can get help in 160 countries. We work around the world so your business can too.

### Heavy Duty Security

Lenovo's biometric fingerprint recognition simplifies access management. Protect identity and secure data with Intel® Authenticate for more robust policy enforcement options.

# ThinkPad T Series

ThinkPad T series builds upon superior design with the performance and durability professional users demand. Celebrated for their award-winning precision keyboards and strong performance, these laptops stand out from the crowd.

The ThinkPad T series of products is ideal for companies who need true business-class notebooks with an all-day battery life.

## Thin and Light with Incredible Safety

ThinkPad T starts at just 3 pounds and 18.8 mm long. Its carbon-fiber cover, spill-resistant keyboard, and shatter-resistant glass provide durability for work on the go.

## Powerful Processing

Equipped with the latest **Intel® Core™** processors and paired with 2GB vRam graphics option, users can switch effortlessly between their favorite apps — increasing their productivity and creativity along the way.

## Superfast PCIe SSD Storage

Unlike a regular mechanical hard drive, a Solid-State Drive (SSD) has no moving parts and performs faster — including booting up (nearly 3X quicker), opening files (as much as 30% faster), and transferring files (around 200 MB/s, compared to 50-120 MB/s). As well as being quieter, it's also more reliable, more rugged, and more secure.

## User Friendly, Business Friendly

Easy to set up and roll out, the T series products are also quick to service, upgrade, and secure. From an everyday user to an IT technician, this business laptop is designed to make life (and work) easier for everyone.

 Windows 10 Pro

Lenovo recommends Windows 10 Pro.

## Less is the New More

The T series products are available with Microsoft Windows 10 Pro Signature Edition. Now, you can say goodbye to unwanted trial ware, apps, or distractions and hello to a faster laptop, from startup to shut down and everything in between.

## Forgot Your Password? No Sweat.

With Lenovo's Match on Chip Fingerprint Reader (Moc FPR), there's no need to worry about remembering your password. Simply touch the fingerprint reader to log in, quickly and securely.

# ThinkPad E Series

Built with security and productivity in mind, the ThinkPad E Series offers users a compelling and durable facade with all the features of a premier business laptop. Lightweight and durable, the ThinkPad E Series is perfect for new businesses and on-the-go users.

## Powerful Performance

Enjoy the new standard for PC performance with the latest **Intel® Core™** processors. Blazingly fast and feature-packed with built-in security, they are ready to take your productivity, creativity, and entertainment to the next level.

## Light Yet Robust

At less than 1" thin and weighing less than 2.3 kg, the Lenovo E series products are designed for you to work from anywhere. Plus, there's no gap between the keys on the keyboard, so the build-up of dust and dirt, which can degrade performance over time, is vastly reduced.

## Secure and Reliable

When it comes to IT security and data breaches, you can never be too careful. That's why the industry-certified Trusted Platform Module is integrated into the Lenovo E series products, enabling file encryption, password protection, boot protection, and more.

## Plenty of Storage

With up to 1 TB of storage space, there's ample room for all your documents, data, and other digital files.

# Lenovo Unified Workspace

Lenovo Unified Workspace enables organizations to securely deliver the right apps and content, to the right users - anytime, anywhere on any device. So your workforce can have the flexibility, policies and tools they need to be more creative, productive and collaborative.

 Windows 10 Pro

Lenovo recommends Windows 10 Pro.

Legacy Windows apps and private or public cloud apps all in one workspace for the user.

OS agnostic - works the same on Windows 7 as it does on Android, iOS, Mac OS or Windows 10.

A consistent experience on corporate-issued machines or mobile/BYOD.

Available on-premises with your existing infrastructure or as a hosted solution managed by Lenovo.

# Lenovo Cloud Solutions

Quickly deploy IT solutions and applications, respond faster to emerging opportunities with cloud solutions from Lenovo, Microsoft, RedHad, SUSE and VMWare.

## Highly Secure

Security is top priority as it impacts not only the cloud stored data, but also puts data of the entire enterprise at risk.

## Scale on Demand

Cloud solutions must be able to scale easily to meet an organization's needs as they evolve and grow.

## Always Available

Organizations require cloud solutions that are always operational, with minimal downtime.

## Easy to Manage

Manageability of a system - which includes the simplicity and speed with which a system is repaired and maintained, is essential.

 Windows 10 Pro

Lenovo recommends Windows 10 Pro.

## Support

**Premier Support:** Avail a dedicated 1-800 phone number and single point of contact for end-to-end case management for OEM software and hardware support. Benefit from courteous, consistent communication from a skilled technical troubleshooter for a speedy resolution.

**Warranty Extensions:** Realize your objectives for cost efficiency, improved service levels, and end-user satisfaction with warranty extensions. Lenovo's flexible warranty options are designed to fit the different needs of your business.

## Protect

**Accidental Damage Protection:** Accidental Damage Protection provides significant savings relative to the cost of repairs or a new system. Users typically save between 28%-80% depending on the machine type and repairs needed.

**Onsite Service Warranty:** Maximizes PC uptime and productivity by providing convenient, fast repair service at your place. Frees your IT staff from installing all internal parts so that they have more time to deal with mission critical business.

**Expedited Depot Repair Warranty:** Customers who purchase Expedited Depot upgrades will receive front of the line, highest priority for repairs in the depot. In the unlikely event that needed parts are backordered, Expedited Depot customers receive priority sequence for backordered parts.

**Keep Your Drive:** Avoid any potential legal and monetary repercussions associated with a breach in data security with Lenovo Keep Your Drive service. It provides predictable upfront costs and eliminates the need for tracking failed drives in transit, giving IT staff the time to concentrate on mission-critical business activities.

Lenovo™

## Deploy

**Encryption Services:** Hard drive encryption is essential to prevent unauthorized access to data sophisticated attacks.

**Asset Tagging:** Having your IT staff manually apply asset tags to your organization's computers is a time-consuming and expensive process. However, Lenovo Asset Tagging removes this burden and reduces your costs by having Lenovo apply your asset tag during manufacturing.

**Deployment Automation Services:** Many IT infrastructure leaders are creating operational efficiencies by simplifying IT deployment and shortening provisioning time. Lenovo fulfills this strategic vision by enabling organizations to increase capacity through shifting specialized technical activities - such as image design and delivery - to hardware manufacturing.

**First Boot Services:** Before your new PCs can be put to use, your technicians need to perform final 'fast boot' configuration tasks. Performed in-house, these tasks can often take your IT staff between 1 and 2 hours. However, with Lenovo First Boot, you can automate the processes for any image type and move the activities into Lenovo manufacturing. As a result, you save time, resources, and costs - right from the start.

**Smart Image:** Manage multiple images and drivers, as well as tackle driver installation issues with Lenovo's Smart Image that gives you compatibility across all Lenovo-based hardware platforms. It combines Lenovo hardware and your Windows® 7/8 image in a single, dynamic imaging solution that manages driver maintenance. As a result, your image maintenance costs can be reduced significantly.

# Lenovo for Workforce Mobility

Enabling the mobile workforce to be productive anytime, anywhere and in any way they need to without compromising on security and manageability of their devices needs a robust unified IT infrastructure. Lenovo is uniquely capable to partner with you on this front. We deliver IT infrastructure solutions that truly equip the future for mobile workforces.
