

# Don't Wait Any Longer: Seize the Power of Lenovo and Windows 10

Now is the time to migrate and transform your business

Adopting new technology is often a matter of timing as organizations work to get every last ounce of functionality from legacy hardware and software before upgrading. However, the business-critical improvements and features of Windows 10 can help propel innovation and increase efficiencies that impact the bottom line—benefits you can't afford to put on the backburner indefinitely. The time is now.

 **Windows 10 Pro**

Lenovo recommends Windows 10 Pro

**Lenovo**

Windows 10 combines serious business performance with a design and feature set that match how people work today. This means deep personalization, secure mobility, and consistent productivity across diverse devices and locations.

### Windows 10: Why Now?

Moving to a new OS can initially feel taxing as both IT staff and end-users adapt to new capabilities together. However, many decision-makers are realizing that their aging technology has been slowing critical business functions down. Embracing a better OS and hardware platform is a crucial step in keeping your organization ahead of the game, especially thanks to the powerful benefits Windows 10 provides:

- **Security:** Windows 10 is built for comprehensive security from the ground up, with root-level malware protection, integrated data containerization, and support for advanced multifactor authentication. It also integrates easily with secure, certified components and features like fingerprint readers and the full-drive encryption found in Lenovo products.
- **Productivity:** Organizations enjoy tighter integration with Microsoft cloud services through Azure Active Directory as well as improved mobile device management (MDM). Microsoft also specifically gathered a total of over 200,000 pieces of feedback from users and incorporated them into the redesign to ensure an OS ready for modern productivity challenges.
- **End-user experience:** Windows 10 offers a unified experience across multiple devices and modern applications, including touch, pen, tablet functionality, and a personal assistant.
- **Improved speed and ease:** By listening to customers and partners, Microsoft created an operating system that solves real-life challenges. Deployment is easier, automatic OS updates are possible, and quick boot times allow people to move on to critical tasks faster and get the job done.
- **Competitive edge:** Companies can shift time and money savings away from maintaining obsolete technologies and instead spend their efforts improving overall operations and core business offerings.

## Lenovo Offers a Robust Portfolio of Windows 10 Devices

Designed to help businesses get the most for their budget and accelerate time to market, Lenovo and Windows 10 ultimately represents a smart move for organizations wanting to get ahead of the curve in a world that depends on nonstop speed, secure connectivity, and collaboration. Learn firsthand why businesses worldwide are relying on Windows 10 and Lenovo to unlock a brighter technology future.

	ThinkPad X1 Carbon	ThinkPad X1 Yoga™	ThinkPad X380 Yoga
<b>Why this Device?</b>	An ultrathin and ultralight design, tough carbon fiber durability, and long battery life make the X1 Carbon the ultimate in mobility and performance.	Work, present, create, and connect anywhere with an ultraportable form factor and stunning display. Optional ThinkPad Pen Pro.	This stylish powerhouse adapts to work with you—as a laptop, tablet, or anything in between. Moreover, hardware-level security features provide peace of mind when you're on the go.
