Connecting your Data Center
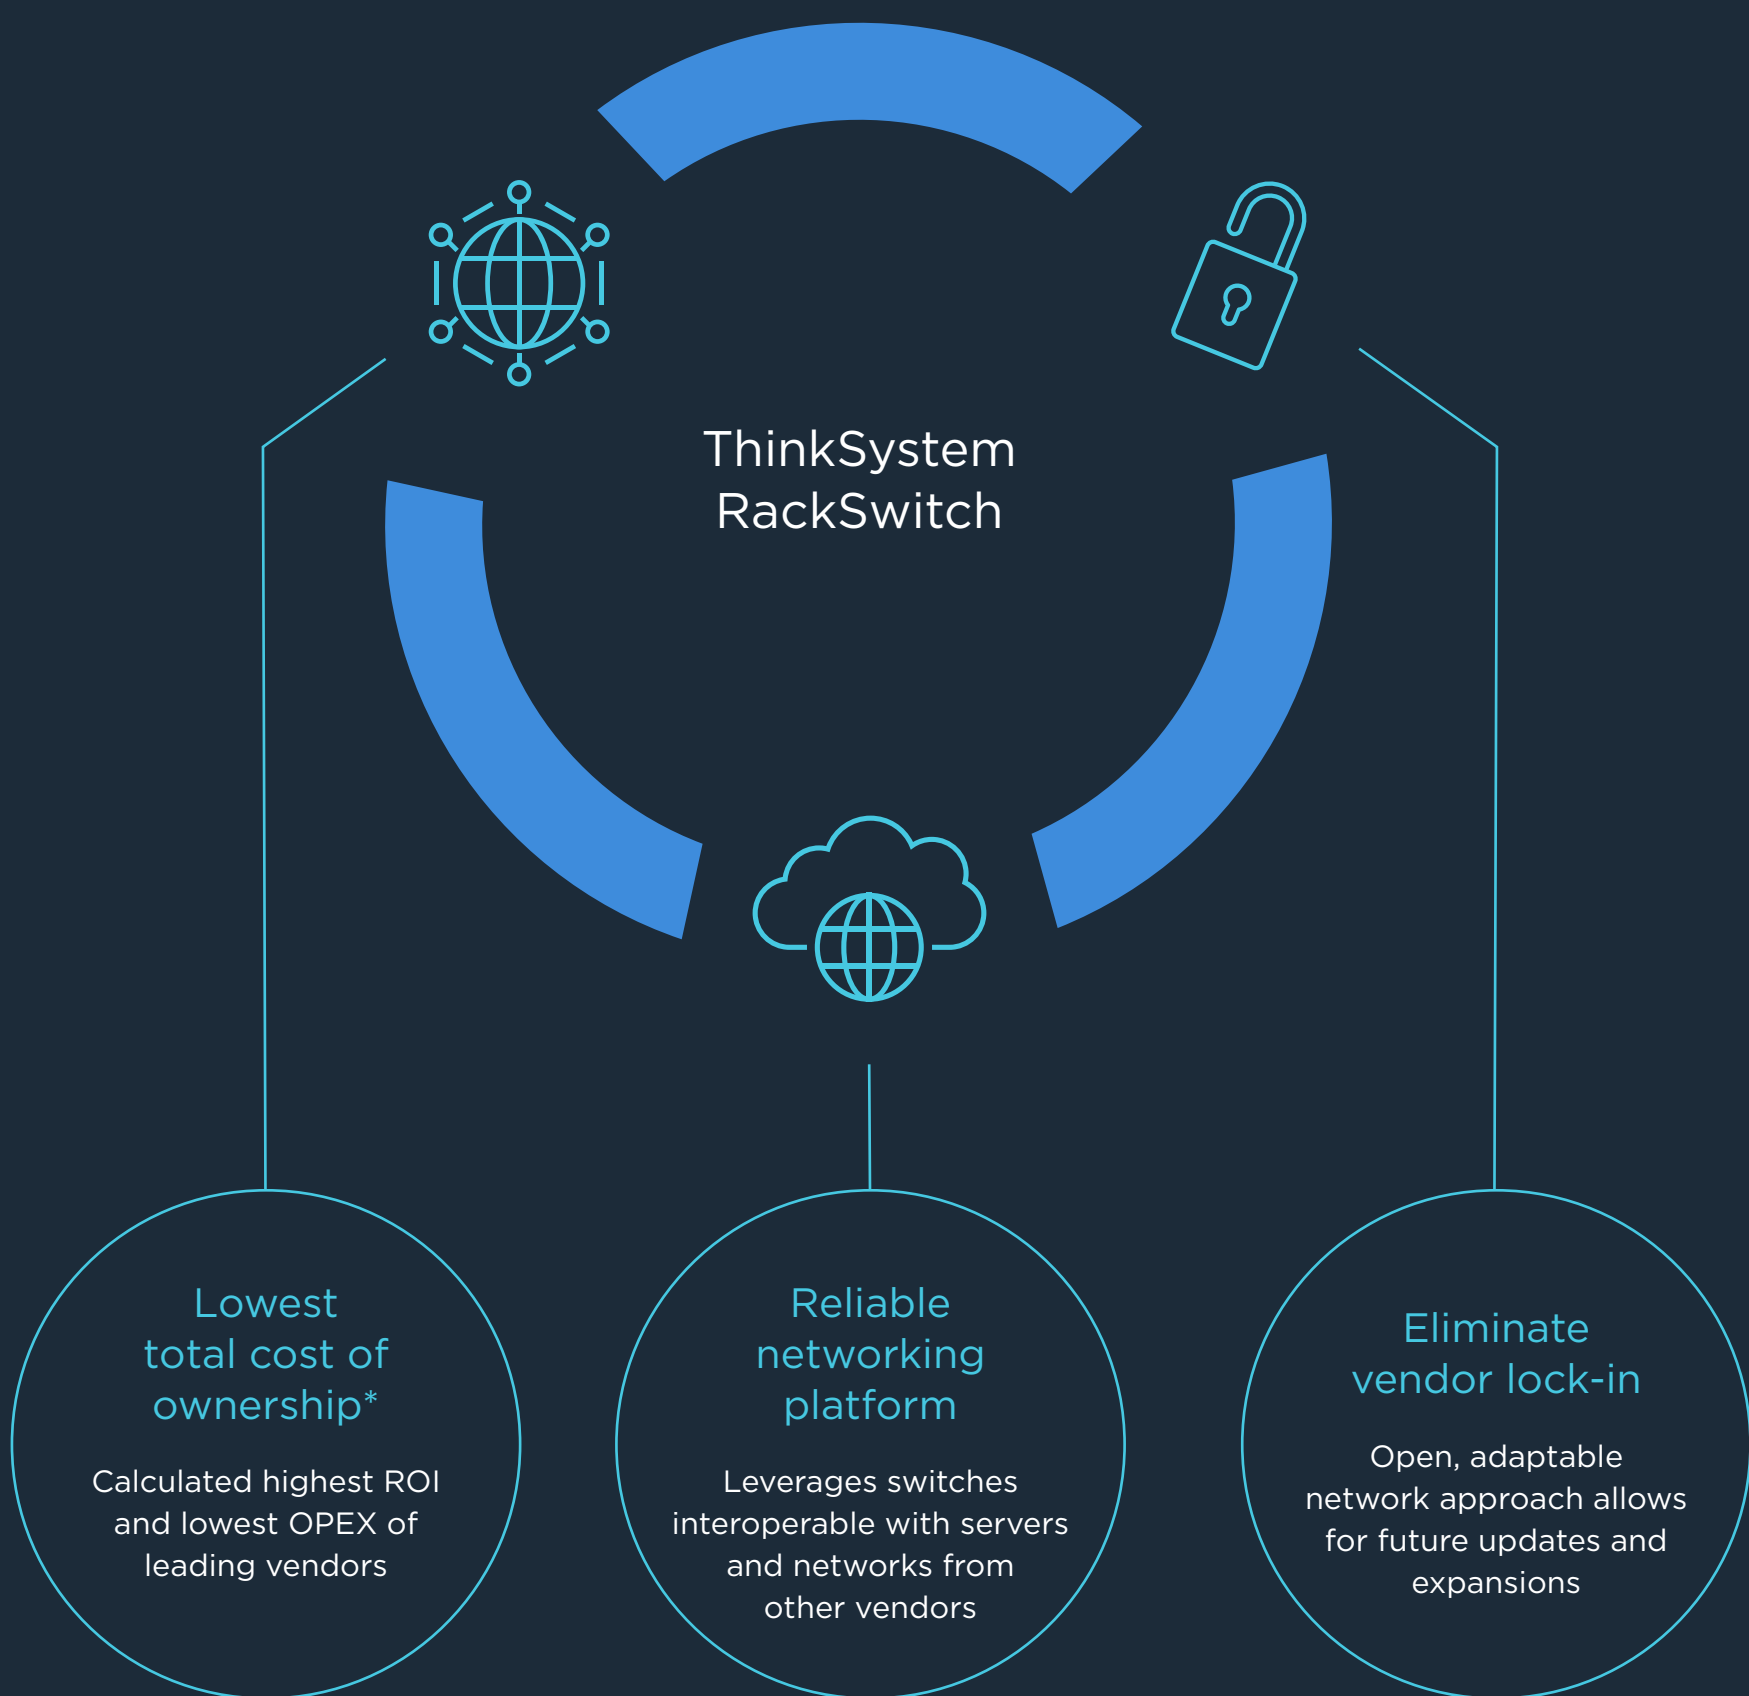

Networking Solutions

Modern workloads in your data center demand flexible, fast, simple, and reliable connectivity.
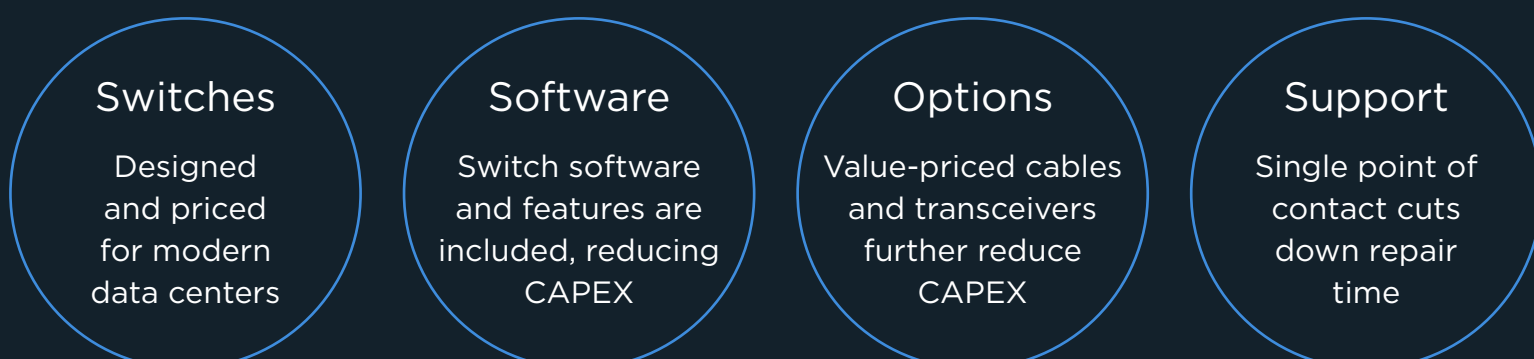

Lenovo.

ThinkAgile   **ThinkSystem**

That's where affordable networking infrastructure comes in, providing the connectivity needed to support mission critical environments such as SAP HANA and new computing models like hyperconverged infrastructure. Lenovo networking solutions offer you the ability to move data faster and more efficiently with high-speed Ethernet connectivity and automation to achieve new levels of efficiency.

ThinkSystem RackSwitch

Lowest total cost of ownership*
Calculated highest ROI and lowest OPEX of leading vendors

Reliable networking platform
Leverages switches interoperable with servers and networks from other vendors

Eliminate vendor lock-in
Open, adaptable network approach allows for future updates and expansions

Lenovo provides more value for your investment, compared to the competition.

According to ACG Research, operational expenditures using Lenovo's DC switches are 24% and 50% lower, relative to two leading vendors.

Switches
Designed and priced for modern data centers

Software
Switch software and features are included, reducing CAPEX

Options
Value-priced cables and transceivers further reduce CAPEX

Support
Single point of contact cuts down repair time
