Flash BIOS update - ThinkCentre A50 (type 8084, 8085, 8126, 8147, 8148, 8149, 8174, 8175, 8176, 8177, 8178, 8179)

↓ Applicable countries and regions

This package updates the basic input/output system (BIOS) on IBM ThinkCentre 8084, 8085, 8126, 8147, 8148, 8149, 8174, 8175, 8176, 8177, 8178, and 8179 systems.

BIOS is programming that controls low-level hardware operations, including interactions with diskette drives, hard disk drives, and the keyboard. The BIOS is stored on a chip. Your computer uses flash BIOS, which can be updated through a program on a flash diskette so that you do not have to replace the BIOS chip to update the BIOS.

Note: Make note of any settings you have changed in the BIOS. Settings may have to be re-entered after

Print this file so that you can refer to it during the installation.
