

DO YOU HATE INTERRUPTIONS AS MUCH AS WE DO?

A slow and unreliable PC can interrupt thoughts, ideas, and meetings.

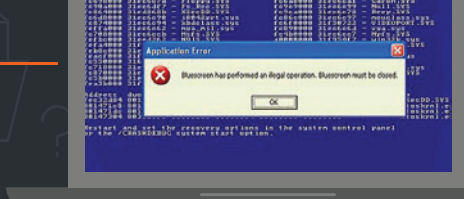

DON'T LET YOUR PC SLOW YOU DOWN.

SIGNS THAT YOUR PC COULD BE HOLDING YOU BACK!

Sluggish Hardware

Does your PC crash often when you try opening large files?

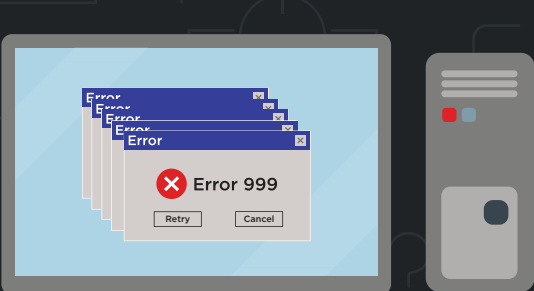

Does your laptop heat up when you place it on your lap and work?

Do you have trouble finding relevant ports while connecting to an external monitor?

Obsolete Software

Does your screen freeze often?

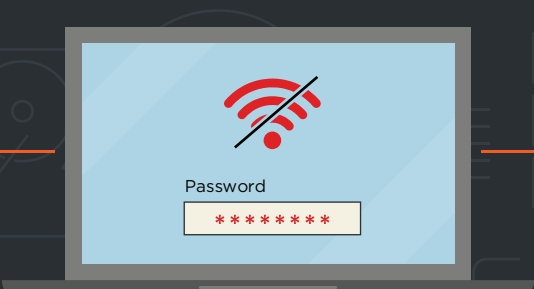

Does your PC shut down on its own?

Did you miss the latest patch or software update?

Weak Security

Do you have a policy that doesn't let you connect to public WiFi networks?

Are you scared that someone might be snooping through your PC's camera?

Do you frequently take a backup of your official data on personal hard drives?

If you answered 'YES' to any of the above, you are facing a productivity challenge.

Studies show that it takes people an average of 25 minutes to get back to the point they were at before a distraction¹.

A disruption at work can cause employees to lose focus and affect their productivity. Lenovo's Interruption Mitigation solutions allow you to work, unhindered.

HIGH COST OF INTERRUPTIONS

An estimated **\$588 billion a year** in the US alone²

According to UC Irvine study, a **2.8-second interruption doubled the error rates** of the subjects²

Employees who are frequently interrupted reported **9% higher exhaustion rates**²

IT'S NO SURPRISE THAT

Improving workforce productivity is **ranked no.1** in the 2018 top 10 mid-market **business issues**³

33% of IT and business decision-makers agree that **investing in better technologies to enhance employee productivity** helps attract and retain talent⁴

WITH LENOVO, MITIGATE YOUR RISK OF INTERRUPTIONS

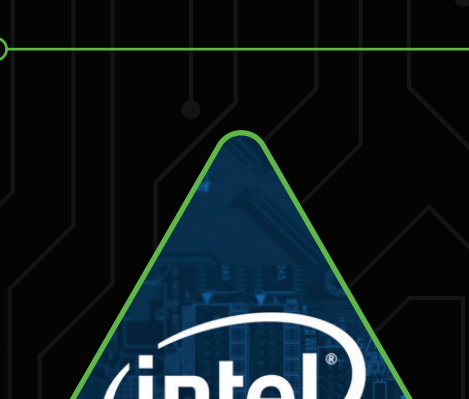

Lenovo Vantage Assist

- Intelligent feature turns on the battery saver mode automatically for extended use
- When integrated with Google or Office 365 calendar, its unique feature analyzes meeting schedules and reminds users to carry an AC charger to a long meeting

Lenovo Online Data Backup

- Automatic and encryption-based online backup and recovery solution
- Safeguards business data from unexpected risks like accidents, OS and application errors, and hard drive failures
- Highly efficient, less intensive for the user and not as prone to human error

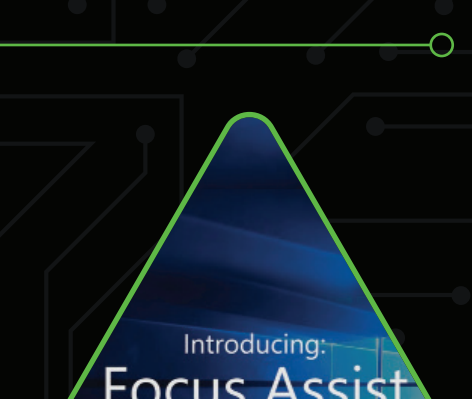

Intel® Active Management (Intel® AMT)

- IT teams can resolve interruptions like the recovery of a virus-infected system remotely
- Simple device lifecycle management by wiping drives and encryption keys in seconds on Intel® AMT-activated system

Windows 10 Focus Assist

- Blocks notifications, sounds, and alerts to avoid distractions during work times
- Users can set up a priority list to bypass the blocking feature to stay updated on important events
