Lenovo Suppliers

Following is the list of Lenovo suppliers as of January 2018. The list represents a majority of our procurement spend. Lenovo drives the smallest supply base possible, not just to leverage procurement spend and the most competitive supplier prices but also to concentrate our corporate social responsibility efforts. Generally speaking, Lenovo suppliers are in validation programs to ensure robust and industry-standard sustainability programs and reports, have made formal commitments to responsibility contracts and codes of conduct, undergo regular assessments and audits to the Responsible Business Alliance (RBA) Code of Conduct, report their GHG / water / waste output and reduction goals, and are actively working to avoid contributing to human rights abuses associated with conflict minerals.

Lenovo does not limit our sustainability focus to just our Tier 1 suppliers. Our formal procurement relationships and program efforts noted above go well beyond Tier 1. Approximately 60% of our procurement spend act as Tier 2 suppliers and are in our direct validation programs. Approximately 30% of our procurement spend acts as Tier 3 suppliers and are in our programs.
