**25,000+**  
Schools

# Teachers and Educators

Radix **VISO** enables teachers to easily manage their classroom, equipped with school-owned and BYOD devices. Teachers are able to observe their students' activities and evaluate performance in real time, provide one-on-one or group assistance, and engage in collaborative learning methodologies.

- **Share** teacher's or student's **screens** with the class
- **Distribute content** and **share websites**
- Engage in collaborative learning with **multi-user whiteboard**
- **Respond** to electronic "hand raises" silently
- **View thumbnails** of students' screens
- Work alongside or **take full control** over screens **remotely**
- **Focus students on-task** and apply device usage policies
- **Lock screens** for maximizing attention and minimizing distractions
- **Limit access** by white and black listing of **websites and apps**

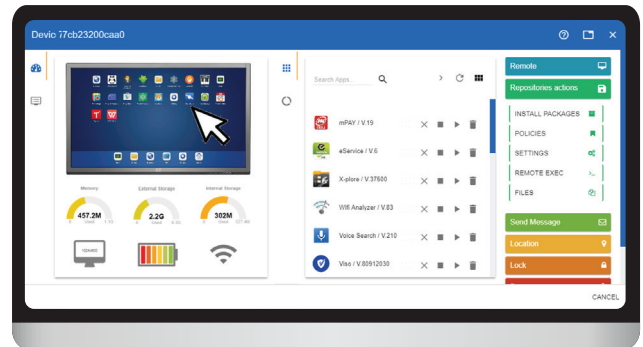

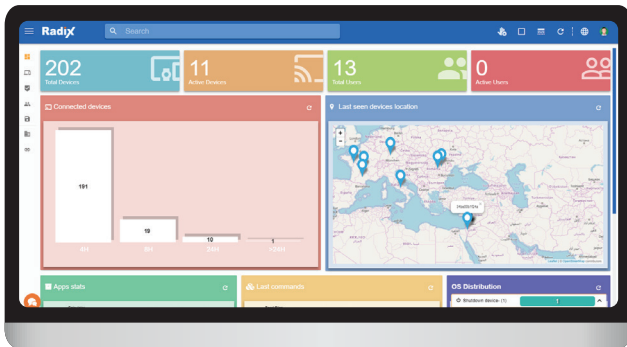

Teacher View Module

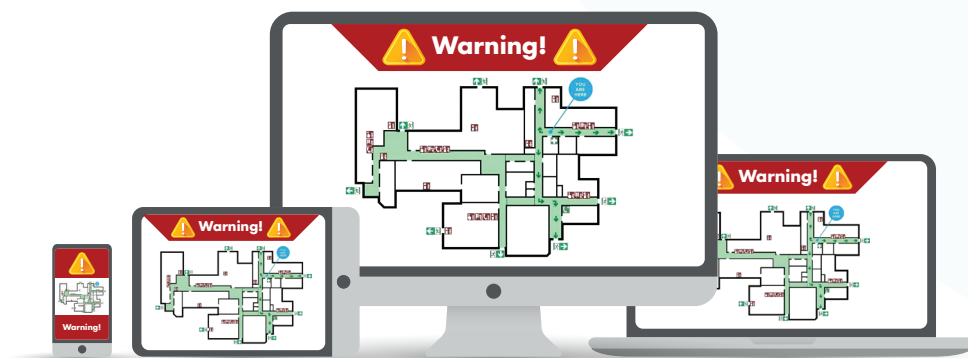

# Principals and IT Administrators

Radix **VISO** MDM delivers a birds-eye view with hands-on management for the entire fleet of assorted devices within a school and even throughout the district. Highly flexible, the **VISO** MDM can be scaled up from just a handful of devices to hundreds of thousands - simply and swiftly.

- Centrally manage apps, OS settings and updates of all devices
- Apply and **enforce school policies** and regulations
- **Install applications** and updates on all devices remotely
- Simplify **batch tasks** and simultaneous workflows
- Take **remote control** over devices for assistance
- **Group and tag devices** according to pre-defined criteria
- **Analyze** device, web and app usage to **make fact-based decisions**
- **Create geo-fences** and device location perimeters
- **Lock, track and wipe** lost or stolen devices
- **Broadcast alerts** and notices to all or selected screens

Advanced Messaging and Alerts Module

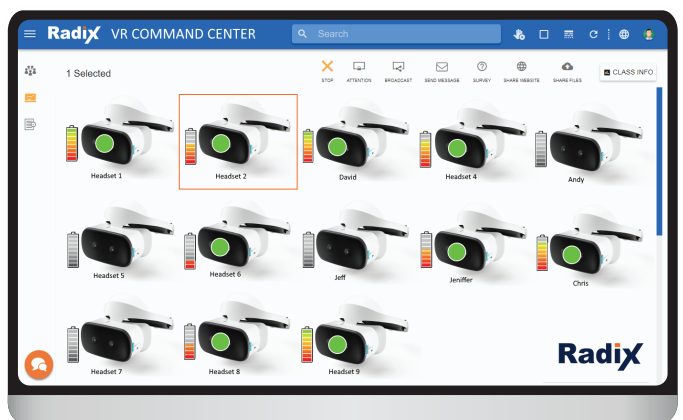

## Radix **VISO** MDM for all types of devices

Serving as a comprehensive platform for managing multiple technologies, the **VISO** MDM platform can accommodate mobile devices, interactive touch screens, digital signage, information kiosks, VR consoles, rugged devices and more.

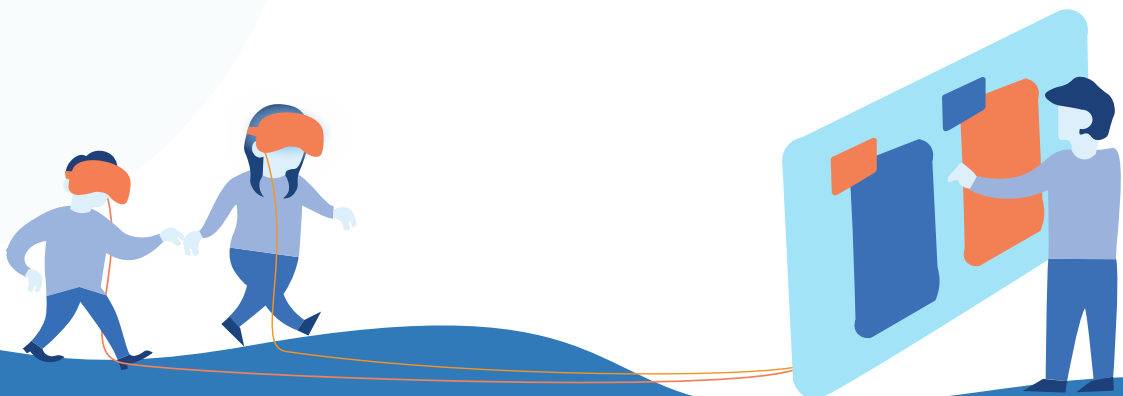

## VR Command Center

Radix **VISO** facilitates simultaneous control of multiple VR headsets for unified and coordinated multi-user management.

- Set and **coordinate** all VR devices through **one dashboard**
- Simultaneously **launch apps** and pause, stop or skip **videos**
- Allow, block or lock certain apps and apply **kiosk modes**
- Provide one-on-one **remote assistance**
- Establish end-to-end **visual and vocal communication**
- Share **interactive virtual whiteboards**, surveys and quizzes
- **Transfer files** to all VR devices simultaneously
