Think**UEM**

UNIFIED ENDPOINT MANAGEMENT

SIMPLE • EFFICIENT • AFFORDABLE

Businesses in almost every industry rely on mobile devices to perform simple daily tasks. A number of those businesses deploy a range of mobile devices as well as BYOD strategies. Organizations must have an efficient and cohesive endpoint management system that can control multiple platforms from one centralized source. UEM supports all mobile strategies, enabling employees to execute their business tasks securely, whether it is a BYOD or corporate-own.

THE SOLUTION

ThinkUEM is designed to provide organizations of any size with the ability to manage all endpoints with real-time visibility. ThinkUEM enables you to centralize and streamline the management of traditional mobile devices and IoT devices through a single platform. It allows you to get a handle on your BYOD workforce, ensuring that you are able to enforce policies and procedures while protecting corporate data. Whether On-Premise or in the cloud, ThinkUEM provides organizations an intuitive, user-friendly way of simplifying the complexities of supporting a mobile workforce at an affordable price.

DEFINE AND ENFORCE USAGE POLICIES
